DEPARTMENT OF THE ARMY  
JUSTIFICATION OF ESTIMATES FOR 2001

APPROPRIATION LANGUAGE

MILITARY CONSTRUCTION, ARMY NATIONAL GUARD

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army National Guard, as authorized by Chapter 1803 of Title 10, United States Code, as amended, and the Reserve Forces Facilities Act \$59,130,000 (\$66,363,000) to remain available until 30 September 2004 (30 September 2005).

## SPECIAL PROGRAM CONSIDERATIONS

**POLLUTION ABATEMENT:** The military construction projects proposed in the program will be designed to meet environmental standards. Military construction projects proposed primarily for abatement of the existing pollution programs at installations have been reviewed to ensure that corrective design is accomplished in accordance with specific standards and criteria.

**ENERGY CONSERVATION:** Military construction projects specifically for energy conservation at installations have been developed, reviewed, and selected with prioritization by energy savings per investment cost. Projects include improvements to existing facilities and utility systems to upgrade design, eliminate waste, and install energy savings devices. Projects are designed for minimum energy consumption.

**FLOOD PLAIN MANAGEMENT AND WETLANDS PROTECTION:** Proposed land acquisition, disposition, and installation construction projects have been planned to allow the proper management of flood plains and the protection of wetlands by avoiding long and short-term adverse impacts, reducing the risk of flooding losses, and minimizing the loss or degradation of wetlands. Project planning is in accordance with the requirements of Executive Order No. 11988 and 11990.

**DESIGN FOR ACCESSIBILITY OF PHYSICALLY HANDICAPPED PERSONNEL:** In accordance with Public Law 90-480, provisions for physically handicapped personnel will be provided for, where appropriate, in the design of facilities included in this program.

**PRESERVATION OF HISTORICAL SITES AND STRUCTURES:** Facilities included in this program do not directly or indirectly affect a district, site, building, structure, object, or setting listed in the National Register of Historic Places, except as noted on DD Form 1391.

**USE OF EXCESS SCHOOLS AND OTHER BUILDINGS:** Considerations were made to utilize available commercial or academic buildings, but none were found suitable.

**ENVIRONMENTAL PROTECTION:** In accordance with Section 102(2)(c) of the National Environmental Policy Act of 1969 (PL 91-190),

the environmental impact analysis process has been completed or is actively underway for all projects in the Military Construction Program.

**NON-MILCON CONSTRUCTION:** \$127.5 million in the FY01 ARNG Real Property Operations and Maintenance Program will maintain 36,825,695 SF in 5,772 logistical support buildings. Furthermore, it supports 283 training sites, 12,834 buildings totaling 36,558,417 SF in the 54 States, Territories and Commonwealths used by the ARNG, and other DoD component forces. The funding is dedicated to Annual Recurring Maintenance of \$57.4 million and routine or emergency maintenance and repair projects of approximately \$49.0 million.

**LONG-TERM FACILITIES CONTRACTS:** The National Guard does not have any long-term facilities contracts.

**CONSTRUCTION CRITERIA:** Unless otherwise noted, the projects comply with the scope and design criteria prescribed in Part II of Military Handbook 1190, "Facility Planning and Design Guide."

**ECONOMIC ANALYSIS:** Economics are an inherent aspect of project development and design of military construction projects. Therefore, projects included in this program represent the most economical use of resources.

**RESERVE MANPOWER POTENTIAL:** The Reserve Manpower potential to meet and maintain authorized strengths of all Reserve units in the areas where units are to be located has been reviewed in accordance with the procedures described in DoD Instruction 1225.8. "It has been determined, in coordination with the other Military Departments having Reserve units in the area, that the number of Reserve Components presently located in the area, and those units having been allocated in the area, and those units having been allocated to this area for future activation, is not and shall not be larger than the number that reasonably may be maintained at the authorized strength."

**CONGRESSIONAL REPORTS:** The following is a synopsis of projects contained in Congressional Reports:

**Senate Military Construction Appropriation Bill, 2000 (S.R. 106-74), dated 10 June 1999.**

(Page 22) **Armed Forces Reserve Center/Organizational Maintenance Shop, Glen Jean, WV.**—Of the \$29,667,000 provided for planning and design within the "Army National Guard" account, the Committee directs that not less than \$1,200,000 be made available for the design of an armed forces reserve center and

organizational maintenance shop at Glen Jean, WV.

**ARNG Response:** The State has not provided the programming documents ( DD Forms 1390/91). When they are received, they will be staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State.

**(Page 22) Amy Aviation Support Facility, Bangor, ME.**—Of the \$29,667,000 provided for planning and design within the ``Army National Guard`` account, the Committee directs that not less than \$1,340,000 be made available for the design of an Army aviation support facility located at Bangor, ME.

**ARNG Response:** The design of this project has been funded and a design contract has been awarded.

**(Page 23) Regional Training Institute Dormitory, Gowen Field, ID.**—Of the \$20,771,000 provided for unspecified minor construction within the ``Army National Guard`` account, the Committee directs that not less than \$1,220,000 be made available to construct a regional training institute dormitory at Gowen Field, ID.

**ARNG Response:** The programming documents ( DD Forms 1390/91) are being staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 23) Armed Forces Reserve Center, Smyrna, TN.**—Of the \$29,667,000 provided for planning and design within the ``Army National Guard`` account, the Committee directs that not less than \$1,500,000 be made available for the design of an armed forces reserve center at Smyrna, TN.

**ARNG Response:** The programming documents ( DD Forms 1390/91) have not been received from the State. When they are received, they will be staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State.

**(Page 23) Readiness Center, Williamstown, WV.**—Of the \$29,667,000 provided for planning and design within the ``Army National Guard`` account, the Committee directs that not less than \$500,000 be made available for the design of a readiness center in Wood County, WV.

**ARNG Response:** The programming documents ( DD Forms 1390/91)

are being staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State.

**(Page 23) Armed Forces Reserve Center, Sand Springs, OK.**—The Committee directs the Army National Guard to include the Armed Forces Reserve Center, Sand Springs, Oklahoma in its fiscal year 2001 budget request. The Committee further requests that the National Guard Bureau periodically update the Committee on the status of this project.

**ARNG Response:** The fiscal year 2001 budget estimate submission to the Office of Secretary for Defense included funding for the project. However, during budget review process the Office of Secretary of Defense deferred the project to fiscal year 2002 due to the lack of guarantee information that project execution will occur in fiscal year 2001.

The committee will be updated periodically on the status of this project.

**(Page 23) Regional Training Center, Fort Harrison, MT.**—Of the \$20,771,000 provided for unspecified minor construction within the ``Army National Guard`` account, the Committee directs that not less than \$1,500,000 be made available to construct a regional training institute at Fort Harrison, MT.

**ARNG Response:** The design of this project has been funded and a design contract has been awarded. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 23) Organizational Maintenance Shop, Fair Haven, VT.**—Of the \$20,771,000 provided for unspecified minor construction within the ``Army National Guard`` account, the Committee directs that not less than \$1,400,000 be made available to construct an organizational maintenance shop at Fair Haven, VT.

**ARNG Response:** The design of this project has been funded and a design contract has been awarded. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 23) Readiness center, Bryan, TX.**—Of the \$20,771,000 provided for unspecified minor construction within the ``Army National Guard`` account, the Committee directs that not less than \$1,500,000 be made available to construct a readiness center in Bryan, TX.

**ARNG Response:** The State has not provided the revised

programming documents (DD Forms 1390/91) for the Congressional directed scope. Once revised programming documents are received, staffing complete, project scope approved, design authority will be granted to the State. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 23) Combat Arms Educational Facility, Fort Bragg, NC.**—The Committee notes the urgent requirement for the construction of an Army National Guard combat arms educational facility located at Fort Bragg, NC. This facility was identified by the Army Chief of Staff to serve as part of the Total Army School System and will provide standard individual training and education to active component, Army National Guard and Army Reserve soldiers. The Committee directs the Army National Guard to include funding for this project in its fiscal year 2001 budget submission.

**ARNG Response:** Funding for the project is included in fiscal year 2001 budget submission.

**(Page 24) MOUT assault course, Fort Harrison, MT.**—Of the \$20,771,000 provided for unspecified minor construction within the "Army National Guard" account, the Committee directs that not less than \$1,500,000 be made available to construct a MOUT assault course at Fort Harrison, MT.

**ARNG Response:** The programming documents ( DD Forms 1390/91) are being staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 24) Shoreline Protection, Camp Grafton, ND.**—Of the \$20,771,000 provide for unspecified minor construction within the "Army National Guard" account, the Committee directs that not less than \$1,500,000 be made available for shoreline protection at Camp Grafton, ND.

**ARNG Response:** The design of this project has been funded and a design contract has been awarded. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 24) Utility Expansion, Camp Dawson, WV.**—Of the \$20,771,000 provided for unspecified minor construction within the "Army National Guard" account, the Committee directs that not less than \$650,000 be made available to expand utilities at

Camp Dawson, WV.

**ARNG Response:** The programming documents ( DD Forms 1390/91) are being staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 24) Readiness center, Westfield, MA.**—Of the \$20,771,000 provided for unspecified minor construction within the ``Army National Guard`` account, the Committee directs that not less than \$1,233,000 be made available to construct a temporary readiness support facility in Westfield, MA.

**ARNG Response:** The project have been authorized to proceed with design. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 24) Readiness center, Yakima, WA.**—Of the \$29,667,000 provided for planning and design within the ``Army National Guard`` account, the Committee directs that not less than \$600,000 be made available for the design of an armory in Yakima, WA. Further, the Committee directs that the National Guard Bureau include this project in the fiscal year 2001 budget request.

**ARNG Response:** The programming documents ( DD Forms 1390/91) are being staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State. Funding for the project is included in fiscal year 2001 budget submission.

**(Page 24) Scout Armories, AK.**—Of the \$20,771,000 provided for unspecified minor construction within the ``Army National Guard`` account, the Committee directs that not less than \$1,500,000 be made available for the construction of Scout armories in Nightmute, Tuntutliak, and Petersburg, AK.

**ARNG Response:** The projects have been authorized to proceed with design. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 24) Training Site Maintenance Facility, Fort Harrison, MT.**—Of the \$20,771,000 provided for unspecified minor construction within the ``Army National Guard`` account, the Committee directs that not less than \$1,500,000 be made

available to construct a training site maintenance facility at Fort Harrison, MT.

**ARNG Response:** The programming documents ( DD Forms 1390/91) have been staffed within National Guard Bureau. The project scope has been approved, and the State has been provided design authority. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 24) Armory, Sedalia, MO.**—Of the \$29,667,000 provided for planning and design within the ``Army National Guard`` account, the Committee directs that not less than \$300,000 be made available for the design of an armory to be located in Sedalia, MO.

**ARNG Response:** The programming documents ( DD Forms 1390/91) have been staffed, and scope approved within National Guard Bureau. The State has been authorized to proceed with the design of the project.

**(Page 24) Mobilization and Training Equipment Site/Combined Support Maintenance Shop, Fort Drum, NY.**—Of the \$29,667,000 provided for planning and design within the ``Army National Guard`` account, the Committee directs that not less than \$1,600,000 be made available for the design of these facilities at Fort Drum, NY.

**ARNG Response:** The programming documents ( DD Forms 1390/91) have been staffed, and scope approved within National Guard Bureau. The State has been authorized to proceed with the design of the project.

**(Page 24) Repair Taxiway/Apron, Reno-Stead Airport, NV.**—Of the \$20,771,000 provided for unspecified minor construction within the ``Army National Guard`` account, the Committee directs that not less than \$1,490,000 be made available to reconstruct the apron and taxiway located at the Reno-Stead Airport, NV.

**ARNG Response:** The programming documents ( DD Forms 1390/91) are being staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 24) Readiness center, Bozeman, MT.**—Of the \$29,667,000 provided for planning and design within the ``Army National Guard`` account, the Committee directs that not less than

\$500,000 be made available for the design of a readiness center at Bozeman, MT.

**ARNG Response:** The programming documents ( DD Forms 1390/91) are being staffed within National Guard Bureau. Once the staffing is completed and the project scope approved, design authority will be granted to the State.

**(Page 25) Public Safety Training Center, Spokane, WA.**—Of the \$29,667,000 provided for planning and design within the "Army National Guard" account, the Committee directs that not less than \$2,215,000 be made available for the design of a public safety training center to be located in Spokane, WA.

**ARNG Response:** The programming documents ( DD Forms 1390/91) are being staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State.

**House Military Construction Appropriation Bill, 2000 (H.R. 106-221), dated 2 July 1999**

**(Page 19) Annual Reporting Requirement - Backlog.** The Committee directs the Secretary of the Army and the Director of the Army National Guard to continue to make a joint report annually on the current backlog of facilities requirements of the Army National Guard to be submitted concurrently with the annual budget request.

**ARNG Response:** This report will be submitted to Congress in February 2000.

**(Page 20) Annual Reporting Requirement - Armory Infrastructure.** The Secretary of the Army and the Director of the Army National Guard are directed to continue to report jointly to the Committee by January 1, 2000 on the status of armory infrastructure.

**ARNG Response:** This report will be submitted to Congress in February 2000.

**(Page 21) Future Years Defense Plan.** It is the Committee's view that section 123 of Public Law 104-196 constitutes a continuing permanent requirement for the Army National Guard and the Air National Guard to present the Future Years Defense Plan to Congress concurrent with the President's budget submission for each fiscal year. The Committee will expect subsequent submissions of the Future Years defense Plan to include explanatory notes justifying any modification of prior year's plans.

**ARNG Response:** The Future Years Defense Plan is included in the President's budget submission for fiscal year 2001.

**(Page 20) Arizona-Peoria Readiness Centers And Organizational Maintenance Shop And Yuma Readiness Center.**-The Committee directs the National Guard Bureau to prepare itemized costs for design, construction and land for community-based Readiness Centers in the Arizona cities of Yuma and Peoria. The Peoria center plan should also include an Organization Maintenance Shop and the Yuma center plan should incorporate the proposed partnership between the community and the Guard. Both the Peoria and Yuma facilities are urgently needed in order that the Arizona Army National Guard can be prepared for activation and deployment; whereas existing facilities do not promote the mission.

**ARNG Response:** The State needs to conduct preliminary site surveys, to prepare, and submit the programming documents (DD Forms 1390/91) for the proposed projects. Once the programming documents are received, National Guard Bureau will staff programming documents and approve the projects scope. Once the projects scopes are approved, National Guard Bureau will provide the required itemized costs for design, construction, and land for community based Readiness Centers in the Arizona cities of Yuma and Peoria.

**(Page 20) Georgia-Fort Stewart: Storm Damage**-The Supplemental Appropriations and Rescissions Act for fiscal year 1998 dated May 1, 1998 (P.L. 105-574) appropriated \$3,700,000 for the Army National Guard to demolish and replace buildings destroyed by storm damage at Fort Stewart, Georgia. These funds were designated as an emergency and were only available for obligation during fiscal year 1998. The Army National Guard failed to obligate the money in fiscal year 1998 and the funds expired. The Committee has learned there is still a requirement to replace these buildings at Fort Stewart, Georgia. If this project is a requirement to the Army National Guard, the Committee directs the Army National Guard to use the normal reprogramming procedures to meet the requirement or include the required funding in its fiscal year 2001 budget request.

**ARNG Response:** The requirement to replace buildings at Fort Stewart, Georgia is being accomplished with fiscal year 2000 Unspecified Minor (UMI) construction program funding.

**(Page 20) Oklahoma-Sand Springs: Armed Services Reserve Center-** The Army National Guard is directed to accelerate the design of the Armed Services Reserve Center project at Sand Springs, Oklahoma, and to include the required construction funding in its fiscal year 2001 budget request.

**ARNG Response:** The fiscal year 2001 budget estimate submission to the Office of Secretary of Defense included funding for the project. However, during the budget review process the Office of Secretary for Defense deferred the project to fiscal year 2002 due to the lack of guarantee information that project execution will occur in fiscal year 2001. The committee will be updated periodically on the status of this project.

**(Page 20) New York-Hancock Field: Readiness Center Addition-**The Army National Guard is directed to accelerate the design of the Readiness Center Addition at Hancock Field, New York, and to include the required construction funding in its fiscal year 2001 budget request.

**ARNG Response:** The project have been authorized to proceed with design. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project. Funding for the project is included in fiscal year 2001 budget submission.

**(Page 20) Massachusetts-Barnes Air National Guard Base: Support Facility-**The Army National Guard is currently relocating a UH-1 helicopter unit to the Barnes Air National Guard Base in Massachusetts. The Committee has learned space is required to support the H-1 helicopter unit in the base's Army Aviation Support Facility AASF). Therefore, within funds provided for Unspecified Minor Construction, the Committee directs the Army National Guard to execute a project in the amount of \$1,233,000 to provide a support facility for the unit at the Barnes Air National Guard Base.

**ARNG Response:** The project has been authorized to proceed with design. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 21) Washington-Bremerton: Readiness Center-**The Army National Guard is directed to accelerate the design of the Readiness Center at Bremerton, Washington, and to include the required construction funding in its fiscal year 2001 budget request.

**ARNG Response:** The project have been authorized to proceed with design. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project. Funding for the project is included in fiscal year 2001 budget submission.

**Military Construction Appropriation Conference Report, 2000 (H. R. 106-266), dated 27 July 1999.**

**(Page 14) Florida -- St. Petersburg/Tampa Area: Readiness Center-**Of the additional funding provided for planning and design, the conferees direct that not less than \$3,500,000 be made available for the design of this project.

**ARNG Response:** The State has not provided the programming documents (DD Forms 1390/91) for the Congressional directed scope. Once revised programming documents are received, staffing completed, project scope approved, design authority will be granted to the State.

**(Page 14) Maryland -- Aberdeen Proving Ground (Weide Army Airfield): UH 60 Tie Down Pads.** --The conferees direct that this project is to be accomplished within additional funds provided for unspecified minor construction.

**ARNG Response:** The programming documents ( DD Forms 1390/91) have been staffed within National Guard Bureau. The project scope has been approved, and the State has been provided design authority. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project.

**(Page 14) Minnesota -- Mankato: Training and Community Center.** --The current facility used by the 2nd Battalion 135th Infantry Mechanized was originally built in 1914. The facility has deteriorated extensively and is substandard with respect to Minnesota State Building Codes, the Life Safety Code, Occupational Safety and Health Administration (OSHA) regulations, and requirements identified by the Americans with Disabilities Act (ADA). Therefore, the conferees direct the Army National Guard to accelerate the design of this project, and to include the required funding in its fiscal year 2001 budget request.

**ARNG Response:** The project have been authorized to proceed with design. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project. Funding for the project is included in fiscal year

2001 budget submission.

(Page 15) **Oregon -- Baker City: Readiness Center.** --The conferees direct the Army National Guard to accelerate the design and to include this project in its fiscal year 2001 budget request.

**ARNG Response:** The programming documents ( DD Forms 1390/91) are being staffed within National Guard Bureau. Once the staffing is complete and the project scope approved, design authority will be granted to the State. Once National Guard Bureau has approved the final designs, the State will be granted the authority to bid the project. Funding for the project is included in fiscal year 2001 budget submission.

**Department of Defense Appropriations Bill, 2000 Report (H.R. 106-244), dated 20 July 1999.**

(Page 107) **Oregon-Armed Forces Reserve Center**—The Committee has provided additional funds for Real Property Maintenance for the Army National Guard and directs that \$3,000,000 be provided for remedial site preparation for the Eugene Armed Forces Reserve Center and Organizational Maintenance Shop.

**ARNG Response:** Site preparation is a State funding requirement and can not be funded with Federal funds. The use of Real Property and Maintenance funding for site preparation is a statutory violation and thus can not be used as stated in the Congressional language. Additionally, the State's Adjutant General has recently informed National Guard Bureau that additional funding is not required to facilitate the site preparation for the proposed project.

10. DESCRIPTION OF PROPOSED CONSTRUCTION  A specially designed maintenance facility of pre-engineered steel construction and concrete floor with 2 workbays, workbay space, tool/supply room space, and latrine. Supporting facilities include site preparation, rigid paving, utilities, fencing, and service apron. The above work to include 7.5 ton overhead crane, air compressor, radiant heating and associated authorized equipment required to make this facility functional for its designed purpose. Physical security measures will be incorporated into design, including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas; and berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.  AIR CONDITIONING: TONS				
11. 4. PROJECT TITLE OMS, ADD/ALT (ADRS)	5. PROJECT NUMBER 060275
---	-----------------------------

11. REQUIREMENT CON'T:

CURRENT SITUATION: The Army Division Redesign Study significantly affected the composition of equipment and vehicles supported by the surface maintenance facilities in California. Current facilities are not adequate to support the equipment and vehicles being fielded due to the redesign. Consequently, authorized drive-thru maintenance workbays and supporting facilities are required.

IMPACT IF NOT PROVIDED: The lack of maintenance and working areas to support mission under ADRS will impair the attainment of required mobilization and readiness levels. This decline in military readiness will severely hinder any ability to mobilize.

ADDITIONAL: This project has been coordinated with the state physical security officer and force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-2 dated 1 July 1997. The most similar DoD standards for an organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.

<p>11. REQUIREMENT CONT:</p> <p><u>CURRENT SITUATION:</u> The Army Division Redesign Study significantly affected the composition of equipment and vehicles supported by the surface maintenance facilities in California. Current facilities are not adequate to support the equipment and vehicles being fielded due to the redesign. Consequently, authorized drive-thru maintenance workbays and supporting facilities are required.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The lack of maintenance and working areas to support mission under ADRS will impair the attainment of required mobilization and readiness levels. This decline in military readiness will severely hinder any ability to mobilize.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-2 dated 1 July 1997. The most similar DoD standards for an organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p> <p>AT/FP POC: COL FRED GAGE (916)854-3769    CFMO: LTC DARRYL BALCAO (916)854-3537</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION  Consists of a maintenance facility with two (2) maintenance workbays, plus mechanical room and custodial work areas. Constructed of masonry block with brick veneer, concrete floors, masonry block partitions with a built-up, single membrane or standing seam roofing system. Supporting facilities include military and customer vehicle parking, fencing, sidewalks, and aprons . Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.				
Air Conditioning-      2.7 MT      3 TONS				

1. COMPONENT <b>ARNG</b>	<b>FY 2001 GUARD AND RESERVE MILITARY CONSTRUCTION</b>	2. DATE <b>FEB 00</b>

4. PROJECT TITLE <b>OMS, ADD/ALT (ADRS)</b>		4. PROJECT NUMBER <b>180111</b>
11. REQUIREMENT: <b>226 SM      2,433 (SF)      ADEQUATE: NA      SUBSTANDARD: NA</b> <p><u>PROJECT:</u> Additional workbay and parking space to provide adequate organizational maintenance support for new vehicles and equipment supported by this maintenance shop due to TOE/MTOE changes as a result of Army Division Redesign Study (ADRS). Site of project will be on state land. (New Mission)</p> <p><u>REQUIREMENT:</u> An addition of 226 SM ( 2,433 SF) is requested to permit efficient maintenance support at the organizational level to be performed on vehicles authorized to the units which will be supported by this maintenance shop due to ADRS.</p> <p><u>CURRENT SITUATION:</u> The individuals that will be working in this facility currently work in an overcrowded and substandard maintenance shop. The existing shop, located in Elkhart, IN, is extremely outdated. TOE/MTOE changes due to ADRS has added additional bulky vehicles and equipment that cannot be physically accommodated by the existing structure. Renovating the existing building is not feasible due to the structural configuration. Addition of enlarged workbays allows utilization of existing infrastructure to accomplish the mission with the least expenditure.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The present facility's deficiencies will continue to decrease troop morale. New equipment will not fit into the present shop and can only be worked on outside, making maintenance in inclement weather impossible. The lack of proper and adequate maintenance, impair the attainment of the units' required mobilization readiness levels under ADRS.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-2 dated 1 July 1997. The most similar DoD standards for an organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

4. PROJECT TITLE <b>OMS, ADD/ALT (ADRS)</b>		4. PROJECT NUMBER <b>180112</b>
11. REQUIREMENT: <b>226</b> <b>SM 2,433 (SF)</b> ADEQUATE: NA      SUBSTANDARD: NA		
<p><u>PROJECT:</u> Additional workbay and parking space to provide adequate organizational maintenance support for new vehicles, and equipment supported by this maintenance shop due to TOE/MTOE changes as a result of Army Division Redesign Study (ADRS). Site of project will be on state land. (New Mission)</p> <p><u>REQUIREMENT:</u> An addition of 226 SM ( 2,433 SF) is requested to permit efficient maintenance support at the organizational level to be performed on vehicles authorized to the units which will be supported by this maintenance shop due to ADRS.</p> <p><u>CURRENT SITUATION:</u> The personnel at this facility currently work in an overcrowded and substandard maintenance shop. The existing shop, located in Elkhart, IN, is extremely outdated. TOE/MTOE changes due to ADRS has added additional bulky vehicles and equipment that cannot be physically accommodated by the existing structure. Renovating the existing building is not feasible due to the structural configuration. Addition of enlarged workbays allows utilization of existing infrastructure to accomplish the mission with the least expenditure.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The present facility's deficiencies will continue to decrease troop morale. New equipment will not fit into the present shop and can only be worked on outside making maintenance in inclement weather impossible. The lack of proper and adequate maintenance, impair the attainment of the units' required mobilization readiness levels under ADRS.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-2 dated 1 July 1997. The most similar DoD standards for an organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION  
  
 Addition/alteration to existing Readiness Center Motor Vehicle Storgae Compound (MVSC). Construction consists of site preparation, paving, additional lighting, lightning protection, spill containment measures and fencing. Physical security measures will be incorporated into design including maximum feasible standoff distance between fencing and lighting standards, adequate lighting, demand lighting technology (DELITE) and an anti-climber.

<p><b>PROJECT:</b> Addition/alteration to an existing 900 SY MVSC, with all necessary supporting facilities, i.e. fencing, lighting and spill containment measures in accordance with Army Division Redesign Study (ADRS). Location is on a 4 acre State-owned site. (New Mission)</p> <p><b>REQUIREMENT:</b> An addition is required to adequately provide the unit with the necessary MVSC space. Additional space is required due to unit converting from Infantry to Medium Truck (POL) Company due to ADRS.</p> <p><b>CURRENT SITUATION:</b> The existing MVSC was built in 1958 and is in need of an addition/alteration to meet new mission requirements. The mission of the unit has changed because of ADRS, resulting in a dramatic increase in equipment requirements. The MVSC is inadequate to fully support the Medium Truck (POL) Company due to the lack of adequate military parking area.</p> <p><b>IMPACT IF NOT PROVIDED:</b> The unit will be unable to meet the requirements of its new mission under ADRS and will lack the ability to meet its readiness, security of property, and training objectives. Delays in the funding of this project will force the use of an inadequately sized facility and will result in a decrease in troop readiness and morale.</p> <p><b>ADDITIONAL:</b> This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-1 dated 1 June 1997. The most similar DoD standards for an organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. <b>10. DESCRIPTION OF PROPOSED CONSTRUCTION</b>  THIS PROJECT WILL BE THE ADDITION OF A DRIVE THRU MAINTENANCE BAY TO AN ORGANIZATIONAL MAINTENANCE SHOP. THE ADDITION WILL MATCH THE CONSTRUCTION OF THE EXISTING STRUCTURE AND WILL CONSIST OF PERMANENT MASONRY TYPE CONSTRUCTION, BRICK AND CONCRETE BLOCK UNITS WITH SINGLE PLY EPDM ROOF AND CONCRETE FLOORS. IT WILL INCLUDE ALL REQUIRED MECHANICAL, ELECTRICAL AND PLUMBING EQUIPMENT AND CONNECTIONS. THIS PROJECT ALSO INCLUDES THE EXPANSION OF THE MILITARY VEHICLE STORAGE COMPOUND. IT WILL INCLUDE ADDITIONAL RIGID PAVEMENT WITH FENCING AND LIGHTING. PHYSICAL SECURITY MEASURES WILL BE INCORPORATED INTO DESIGN.					
AIR CONDITIONING - 0 TONS

11. REQUIREMENT: <u>258</u> SM <u>2,410</u> SF ADEQUATE: <u>0</u> SM <u>0</u> SF SUBSTANDARD: NA			
<p><u>PROJECT</u>: This project is to provide a drive thru maintenance bay and additional MVSC to support the Army Division Redesign Study (ADRS). The drive thru maintenance bay is necessary to provide the maintenance personnel space to perform the required maintenance on the new equipment organic to the units. The additional MVSC will provide the required amount of rigid pavement to support the equipment organic to the units in accordance with ADRS. (New Mission)</p> <p><u>REQUIREMENT</u>: A 258 SM (2,410 SF) drive thru maintenance bay, and additional paved MVSC are required to adequately provide the units in the ADRS with the maintenance bays and parking necessary to perform mission due to ADRS.</p> <p><u>CURRENT SITUATION</u>: The Organizational Maintenance Shop does not have a drive thru maintenance bay to support the maintenance required for the equipment organic to the units in the ADRS. The MVSC will not support the increased vehicle storage requirement generated by the POL Supply Bn and therefore additional paved storage area is necessary.</p> <p><u>IMPACT IF NOT PROVIDED</u>: If this project is not approved, the Organizational Maintenance Shop personnel will be unable to perform the required maintenance on the equipment organic to the units under ADRS. Without the additional MVSC space, the POL Supply Bn will be unable to secure their equipment.</p> <p><u>ADDITIONAL</u>: This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 August 1998 and Design Guide 415-2 dated 1 July 1997. The most similar DoD standards for an organizational maintenance shop do not address all of the current criteria incorporated in the Reserve Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>Consists of additions and alterations to an existing Organizational Maintenance Shop to provide for a Combined Maintenance Facility (CMF) with drive-thru workbays for Army Division Redesign Study (ADRS), oversized military equipment. Alterations to three (3) existing maintenance workbays, ten (10) additional workbays (for a total of thirteen (13) maintenance workbays) plus administrative work area. Constructed of masonry block with brick veneer, concrete floors, masonry block partitions with a built-up or single membrane roofing system. Supporting facilities include military and privately-owned vehicle parking, fencing, security lighting, mechanical, vehicle exhaust systems for workbays, utilities, and access road. Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.</p>				
<p><b>AIR CONDITIONING-        0 TONS</b></p>

4. PROJECT TITLE OMS, ADD/ALT (ADRS)		4. PROJECT NUMBER 260170
<p>11. REQUIREMENT: <u>3,040</u> SM <u>32,721</u> SF ADEQUATE: <u>0</u> SM <u>0</u> SF SUBSTANDARD: <u>212</u> SM <u>2280</u> SF</p> <p><u>PROJECT:</u> Additions and alterations to an existing Organizational Maintenance Shop, providing a new Combined Maintenance Facility (CMF) with required maintenance support for vehicles and equipment supported by this maintenance shop in accordance with Army Division Redesign Study (ADRS). Site of project will be on state land. (New Mission)</p> <p><u>REQUIREMENT:</u> A facility requirement for 3,040 SM (32,721 SF) of administrative and workbay space, and 6,749 SM ( 8,072 SY) of rigid paving for military vehicle parking and supporting facilities. Project is requested to permit efficient maintenance support at the organizational level to be performed on vehicles authorized to the units supported by this maintenance shop under ADRS.</p> <p><u>CURRENT SITUATION:</u> The existing facility is an overcrowded and substandard maintenance shop. This shop, located in Midland, Michigan was built in 1974. Since construction, the missions have changed, creating an increase in equipment and maintenance requirements, causing a severe lack of functional space. There is no drive-thru workbay capability in order for the maintenance shop to provide support for over-sized military equipment. Alterations and additions to the existing building is economical due to its condition and the size of the existing site. The geographic location is supportative to the non-colocated units.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Present facility with deficiencies will not support new equipment and vehicles under ADRS and contribute to a postive troop morale. The lack of adequate maintenance work space, training, storage and administrative areas will continue to impair the attainment of the units' required mobilization readiness levels.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-2 dated 1 July 1997. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

11. REQUIREMENT: <u>4,189</u> SM <u>45,096</u> SF ADEQUATE: <u>0</u> SM <u>      </u> SF SUBSTANDARD: <u>2,638</u> SM <u>28,400</u> SF <p><u>PROJECT:</u> This project is to provide an 188-person readiness center of permanent type construction to serve the peace time missions of the assigned unit. The space will permit all personnel to perform the necessary tasks that will improve the units' readiness posture. The site of the project is on state land. (Current Mission)</p> <p><u>REQUIREMENT:</u> A 4,189 SM (45,096 SF) readiness center is required to adequately provide the units housed in this facility with administrative, supply, classroom, locker, latrine, and kitchen space.</p> <p><u>CURRENT SITUATION:</u> The assigned unit currently drills in an overcrowded and substandard facility that was constructed in 1914. Due to age and interior room configuration, this facility is functionally inadequate because of the existing site restriction. Functional space deficiencies have resulted in the units' inability in meeting readiness training objectives.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The units' ability to meet its readiness, recruiting, retention, and training objectives will continue to decline if the personnel are not provided an adequate, and functional replacement facility.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 August 1998 and Design Guide 415-1 dated 1 June 1997. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>Project consists of rigid paving of military vehicle parking area. Construction consists of site preparation, concrete pavement, grading and seeding, outside lighting, fencing, vehicle wash pad and oil/water separator. Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.</p>

11. REQUIREMENT: 4,716 SM    5,640 SY ADEQUATE: 0 SM    0 SY SUBSTANDARD: NA <p><u>PROJECT:</u> Alteration of 5,640 SY of military vehicle parking by installation of concrete pavement, including site preparation, outside lighting, vehicle wash pad, oil/water separator and fencing to provide mission support in accordance with Army Division Redesign Study (ADRS). Location is on 5.5 acre State-owned site. (New Mission)</p> <p><u>REQUIREMENT:</u> An addition of concrete pavement is required to adequately provide the unit housed at this facility with military vehicle parking for heavy POL vehicles assigned to this unit due to ADRS.</p> <p><u>CURRENT SITUATION:</u> The existing facility was built in 1985 with unsurfaced military vehicle parking and is in need of an addition of concrete pavement to meet current mission requirements. The mission of the unit has changed resulting in an increase in heavy POL vehicles and training requirements. The military vehicle parking is inadequate to fully support the POL unit due to the lack of rigid concrete pavement.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The unit will not be unable to meet the requirements of its new mission under ADRS, and will lack the ability to meet readiness, recruiting, retention, and training objectives. Delays in the funding of this project will force the use of an inadequate parking areas, and increase maintenance of parking areas due to deterioration from large vehicles. The lack of proper and adequate military vehicle parking will impair the attainment of required mobilization readiness levels.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-1 dated 1 June 1997. The most similar DoD standards for an organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>Project consists of paving of military vehicle parking area. Construction consists of asphalt removal and disposal, site preparation, rigid concrete pavement, grading and seeding, outside lighting, wash pad, oil/water separator and fencing. Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.</p>

<p>11. REQUIREMENT: <u>3,190</u> SM    <u>3,815</u> SY ADEQUATE:    <u>0</u> SM    <u>0</u> SF    SUBSTANDARD:    NA</p> <p><b>PROJECT:</b> Alteration of 3,350 SY of military vehicle parking by concrete pavement, including removal and disposition of existing asphalt surface, site preparation, concrete placement, outside lighting, wash pad, oil/water separator and fencing to provide mission support in accordance with Army Division Redesign Study (ADRS). Location is on 5 acre State-owned site. (New Mission)</p> <p><b>REQUIREMENT:</b> An addition/alteration of concrete pavement is required to adequately provide the unit housed at this facility with military vehicle parking for heavy POL vehicles assigned to this unit due to ADRS.</p> <p><b>CURRENT SITUATION:</b> The existing facility was built in 1994 with asphalt military vehicle parking, and is in need of an addition and alteration to meet current mission requirements. The mission of the unit has changed resulting in an increase in heavy POL vehicles and training requirements. The military vehicle parking is inadequate to fully support the POL unit due to the lack of rigid concrete pavement.</p> <p><b>IMPACT IF NOT PROVIDED:</b> The unit will not meet the requirements of its new mission under ADRS, and will lack the ability to meet readiness, recruiting, retention, and training objectives. Delays in the funding of this project will force the use of an inadequate parking, and increase maintenance of parking areas due to deterioration from large vehicles. The lack of proper and adequate military vehicle parking will impair the attainment of required mobilization readiness levels.</p> <p><b>ADDITIONAL:</b> This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-1 dated 1 June 1997. The most similar DoD standards for an organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Rehabilitation and alteration of an existing organizational maintenance shop with three (3) maintenance workbays, plus administrative, personnel, and work areas. Construction of a new maintenance work bay is required with expansion of personnel and administrative areas. Upgrades of heating, air-conditioning and ventilation systems to meet ASHRAE standards, and upgrades to fire protection systems and electrical systems to meet life safety code. Supporting facilities includes construction of an enclosed wash platform, load ramp, control waste handling facility, sidewalks, outside lighting, and flammable materials storage. Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.

4. PROJECT TITLE <b>MS ADD/ALT (ADRS)</b>		4. PROJECT NUMBER <b>310068</b>
11. REQUIREMENT: <b>685 SM</b> <i>7,364 (SF)</i> ADEQUATE: <b>0</b> SUBSTANDARD: <b>457 SM</b> <i>4,917 (SF)</i>		
<p><b>PROJECT:</b> Alteration of the Gering Organizational maintenance shop is requested to meet its peacetime maintenance mission in accordance with Army Division Redesign Study (ADRS). The alteration will provide the proper space, electrical service, lighting, ventilation and heating to support the personnel performing maintenance and administrative tasks. (New Mission)</p> <p><b>REQUIREMENT:</b> The Nebraska National Guard is currently under restructuring due to ADRS. The restructuring has forced consolidation of maintenance shops to support new types of equipment and vehicles. This maintenance shop must be renovated to increase the efficiency of maintenance operations to support a higher work load required by the existing facility under ADRS.</p> <p><b>CURRENT SITUATION:</b> The existing shop, located in Gering, Nebraska was built in 1959 and is extremely outdated. Since the existing facility was constructed, the missions have changed, creating an increase in equipment and maintenance requirements. Electrical systems are overloaded, incapable of being expanded. The Ventilation system is not up to current ASHRAE standards. Many fire and life safety systems are outdated. With out these alterations unit readiness and moral will be adversely effected.</p> <p><b>IMPACT IF NOT PROVIDED:</b> Present facilities with deficiencies will not support new equipment and vehicles, as required under ADRS, and maintain a positive troop morale. The lack of proper and adequate maintenance, training, storage and administrative areas will continue to impair the attainment of the units' required mobilization readiness levels.</p> <p><b>ADDITIONAL:</b> This project has been coordinated with the state physical security officer and force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-2 dated 1 July 1997. The most similar DoD standards for organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Rehabilitation and alteration of an existing organizational maintenance shop with three (3) maintenance workbays, plus administrative, personnel, and work areas. Upgrades of heating, air-conditioning and ventilation systems to meet ASHRAE standards, and upgrades to fire protection systems and electrical systems to meet life safety code. This facility has adequate space, but must be reconfigured to effectively and efficiently meet the mission requirements. This facility can be reconfigured to accommodate drive through work bays to support future mission changes. One work bay is unheated and is not mission capable during winter months. Supporting facilities include construction of an enclosed lubrication and inception ramp, sidewalks, outside lighting, and paving of existing rock parking areas. Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained. Air Conditioning 2.7 MT 3 TONS

11. REQUIREMENT: <b>1,081 M   11,641 (SF) ADEQUATE:      0      SUBSTANDARD: 457 SM      4,919 (SF)</b> <p><b>PROJECT:</b> Alteration of the Mead Organizational maintenance shop is requested to meet its peacetime maintenance mission in accordance with Army Division Redesign Study (ADRS). The alteration will provide the proper space, electrical service, lighting, ventilation and heating to support the personnel performing maintenance and administrative tasks. (New Mission)</p> <p><b>REQUIREMENT:</b> The Nebraska National Guard is currently under restructuring due to ADRS. The restructuring has forced consolidation of maintenance shops to support new types of equipment. This maintenance shop must be renovated to increase the efficiency of maintenance operations to support a higher work load required by the existing facility under ADRS.</p> <p><b>CURRENT SITUATION:</b> The existing shop, located in Mead, Nebraska was built in 1960 and is extremely outdated. Since the existing facility was constructed, the missions have changed creating an increase in equipment and maintenance requirements. Electrical systems are overloaded, incapable of being expanded. The ventilation system is not up to current ASHRAE standards. Many fire and life safety systems are outdated. Without these alterations unit readiness and moral will be adversely effected.</p> <p><b>IMPACT IF NOT PROVIDED:</b> Present facilities with deficiencies will not support new equipment and vehicles, as required under ADRS, and maintain a positive troop morale. The lack of proper and adequate maintenance, training, storage and administrative areas will continue to impair the attainment of the units' required mobilization readiness levels.</p> <p><b>ADDITIONAL:</b> This project has been coordinated with the state physical security officer and force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998 and Design Guide 415-2 dated 1 July 1997. The most similar DoD standards for organizational maintenance shop construction do not address all of the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION  Rehabilitation of an existing OMS with two (2) maintenance workbays, plus administrative, personnel, and work areas. The existing OMS, less supporting facilities meets current space requirements. Upgrades of heating, air-conditioning and ventilation systems to meet ASHRAE standards, and upgrades to fire protection systems and electrical systems to meet life safety code are required. Supporting facilities includes construction of an enclosed wash platform, load ramp, control waste handling facility, sidewalks, outside lighting, and flammable materials storage. Additional rigid pavement is required to support new requirements from the reorganization. Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.

10. DESCRIPTION OF PROPOSED CONSTRUCTION <p>A specifically designed two (2) story readiness center addition will be constructed adjacent to the existing readiness center and connected by two (2) glass enclosed walkways. The readiness center addition will be of permanent masonry type construction, matching the façade of the existing armory, with a built-up roof and concrete floors. It will be a stand alone two (2) story structure with mechanical, heating, electrical equipment. Outside supporting facilities include privately owned vehicle parking and sidewalks. Physical Security measures will be incorporated into the design of the addition to include maximum standoff distance from roads, parking areas, and vehicle unloading areas. Berms, heavy landscaping, and bollars will be used to prevent access when standoff distances cannot be maintained. Cost effective energy conserving features will be incorporated into design, including energy management control systems and high efficiency motors, lighting, and HVAC systems.</p> <p>AIR CONDITIONING: 65 Tons</p> <p><b>PROJECT:</b> A new readiness center addition to the existing readiness center is requested to serve the peacetime mission of the units assigned. The space will permit all personnel to perform the necessary tasks that will improve their readiness posture to support combat objectives. (Current Mission)</p> <p><b>REQUIREMENT:</b> This 3,780 SM readiness center addition is required to adequately house four (4) enhanced brigade units: HHC (-) 27 Bde, HSC 427 Spt BN, 227 MI CO, and CO C(-) 1-108 IN. These units have a required strength of 445 soldiers. The addition will provide the necessary administrative, training, and storage areas required to maintain proficiency in required training tasks. Federally owned property is available for this project on Hancock Field, Syracuse, New York.</p> <p><b>CURRENT SITUATION:</b> The two (2) existing readiness centers are located in Syracuse. One is the Genesee Street Readiness Center that was constructed in 1941, and is functionally obsolete and requires replacement or major rehabilitation. The other readiness center was built in 1992 on Hancock Field.</p>

3. INSTALLATION AND LOCATION HANCOCK FIELD, SYRACUSE, NEW YORK		
4. PROJECT TITLE READINESS CENTER ADDITION		5. PROJECT NUMBER 360137
11. REQUIREMENT: 3,780 SM 40,687 SF      ADEQUATE: 0 SF      SUBSTANDARD: 4,281 SM 46,080 SF  Our proposal is to construct an addition to the Hancock Field Readiness Center and then relocate the units from the obsolete center (Genesee Street) to the new addition. This would consolidate all NYARNG activities in Syracuse at one modern location on federal property. In addition, an OMS which supports all the affected units in Syracuse, is being constructed at Hancock Field from FY 98 Unspecified Minor Construction funding which will further increase readiness. <u>IMPACT IF NOT PROVIDED:</u> If this readiness center addition is not constructed, the units assigned to the Genesee Street Readiness Center in Syracuse will continue to occupy a functionally obsolete building constructed in 1941. The existing readiness center has structural, roof, and environmental problems to include asbestos contamination. Our intent is to provide a readiness center addition to the Hancock Field Armory, thus reducing the NYARNG's presence in Syracuse to one (1) modern, functional, and safe location. The ability of the units assigned to the Genesee Street Readiness Center (227 MI CO, and CO C (-) 1-108 IN to properly train, store their equipment, and prepare for mobilization will continue to degrade if this new addition is not constructed. <u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and no force protection/combatting terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 August 1998, and Design Guide 415-12 dated 1 July 1997. The most similar DOD standards for readiness center construction do not address all the current criteria incorporated in the Army National Guard Readiness Center design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods for meeting this requirement has been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.

10. DESCRIPTION OF PROPOSED CONSTRUCTION A specially designed educational complex composed of several groupings of buildings featuring masonry construction, concrete floors, and gable roofs utilizing materials that comply with Fort Bragg Installation Design Guide requirements. This project is the first phase of a three-phase endeavor, and includes 5,857 SM/63,026 SF for administration, education, dining and billeting. Building heights will be one or two stories, depending on functional requirements and economic considerations. Supporting facilities in this phase will include POV parking, sidewalks, exterior signage and utilities. Physical security measures will be incorporated into the design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, as well as berms, heavy landscaping and bollards to prevent access when standoff distance cannot be maintained.				
Air Conditioning - 43 MT ( 47 TONS)

11. REQUIREMENT: 5,857 SM 63,026 SF ADEQUATE: 0 SF SUBSTANDARD: 8,010 SM 86,205 SF <p><b>PROJECT:</b> A new facility is requested to fill a regional requirement for combat arms instruction space. This facility will operate in conjunction with the proposed 18th Airborne Corps Soldier Development Complex, a grouping of critical Fort Bragg educational facilities, which will include the Soldier Development Center, the Long Distance Learning Center, and the Synthetic Theater of War Range Training Facility. This facility will improve training proficiency of all soldiers that attend, thereby, enhancing the readiness posture of sponsor units. Location is on a 14 hectare (35 acre) licensed federal site. (Current Mission)</p> <p><b>REQUIREMENT:</b> A 5,857 SM (63,026 SF) training complex is required for combat arms instruction for all units of the North Carolina National Guard, and will serve as a regional facility for active and reserve component units.</p> <p><b>CURRENT SITUATION:</b> The existing facilities are several World War II barracks that house the 139th Regiment Southeast Regional Combat Arms Training Brigade (CATB). The current facility is undersized for administrative, class rooms, dining and billeting space, substandard and not cost effective for renovation, and will be demolished by Fort Bragg within the next several years.</p> <p><b>IMPACT IF NOT PROVIDED:</b> Present facilities deficiencies will continue to negatively impact on troop morale and training proficiency. Fewer school spaces will be available due to limited space, and overall readiness will be adversely affected. Within five years, Fort Bragg will begin to demolish our facilities, leaving the CATB without a training location.</p> <p><b>ADDITIONAL:</b> This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 Aug 1998. State historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>A specially designed Readiness Center of permanent type construction, standing seam metal roof, and concrete floors. A single story structure with system, mechanical and electrical equipment and outside supporting facilities, to include; military and off-street parking, access road, wash platform, and sidewalks. Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.</p>

11. REQUIREMENT:      3,100 SM      34,444 SF      ADEQUATE: NA      SUBSTANDARD: 1,091 SM      11,742 SF <p><u>PROJECT:</u> A new readiness center of permanent type construction is requested to serve the peacetime mission of the assigned unit. The space will permit all personnel to perform tasks necessary to improve the unit readiness posture. This readiness center is being constructed on state land. (Current Mission)</p> <p><u>REQUIREMENT:</u> This facility is required to house a line company of M-1 tanks consisting of 87 personnel. This armory will provide necessary administrative, training, and equipment storage areas necessary to achieve proficiency in required training and to accomplish assigned readiness objectives.</p> <p><u>CURRENT SITUATION:</u> Company A, 3rd Battalion, 116 Cavalry (Armor) existing armory is inadequate due to being undersized in administrative, training and equipment storage areas. The current substandard armory was constructed in 1951. There are no other facilities in this area to support this unit.</p> <p><u>IMPACT IF NOT PROVIDED:</u> Present facility deficiencies will continue to negatively impact troop morale and retention. Lack of proper and adequate training, storage, and administrative areas will impair attainment of required readiness levels.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations, and design guides for protecting Federal property are required. This project complies with the scope, and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 August 1997, and Design Guide 415-1 dated 1 June 1997. The most similar DoD standards do not address all of the current criteria incorporated in the (project type) design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p> <p>AT/FP POC: CPT MICHAEL GILLET (503)945-3864      CFMO: LTC JAMES LYMAN(503)945-3871</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION				
<p>A specially designed Readiness Center of permanent masonry type construction, brick and concrete block units with concrete floors, and a built-up, standing seam metal or single membrane roofing system. A one-story structure with mechanical and electrical equipment. Outside supporting facilities include military and privately-owned vehicle parking, fencing, sidewalks, exterior fire protection, outside lighting, access roads, detached facility sign, wash platform, storm water management system and flagpole. Physical security measures will be incorporated into design including maximum feasible standoff distance from roads, parking areas, and vehicle unloading areas, berms, heavy landscaping, and bollards to prevent access when standoff distance cannot be maintained.</p>

11. REQUIREMENT:      2,750 SM      30,557 SF      ADEQUATE: NA      SUBSTANDARD: NA  <p><u>PROJECT:</u> This project is to provide an 74-person readiness center, of permanent type construction to serve the peace time missions of the assigned unit. The space will permit all personnel to perform the necessary tasks that will improve the units readiness posture. The site is on state land. (Current Mission)</p> <p><u>REQUIREMENT:</u> A 2,750 SM (30,557 SF) readiness center is required to adequately provide the units housed in this facility with authorized functional'areas. (e.g. administrative, supply, classroom, locker, latrine, and kitchen space.)</p> <p><u>CURRENT SITUATION:</u> The individuals assigned to this unit drill and train in two overcrowded and substandard facilities, one of which was constructed in 1943 and the other in 1954. These facilities do not provide sufficient administrative or classroom space. The food preparation area consists of a small, residential style, break-area kitchen with no storage or scullery. Individual weapons training must be accomplished at Ft. Lewis (more than a two hour trip, one way) due to no indoor range. Privately owned and military vehicle parking is on gravel which drains directly into a salmon bearing stream with no storm water management system. The state has acquired funding for the design of this readiness center project.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The units' ability to meet its readiness, recruiting and retention, and training objectives will continue to be adversely affected if the personnel are not provided with the proper facilities they critically need to enhance recruiting, and personnel retention and to maintain military skills.</p> <p><u>ADDITIONAL:</u> In conjunction with the Kitsap County Emergency Services and Olympic College, this new facility will be the keystone of fire and police training, Kitsap County emegency services dispatch center (E-911), Naval firefighter training, first responder training in support of Counter Terrorism and Weapons of Mass Destruction and distant learning. This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 August 1997 and Design Guide 415-1 dated 1 June 1997. The most similar DoD standards do not address all of the current criteria incorporated in the (project type) design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

11. REQUIREMENT:      6,322 SM      70,243 SF      ADEQUATE: NA      SUBSTANDARD: NA  <p><u>PROJECT:</u> This project is to provide an 287-person Readiness Center, of permanent type construction to serve the peace time missions of the assigned units. The space will permit all personnel to perform the necessary tasks that will improve the units readiness posture, secure storage of sensitive and valuable equipment and daily administrative/ personnel issues. The site of the project is on state land. (New Mission)</p> <p><u>REQUIREMENT:</u> A 6,322 SM (70,243 SF) readiness center is required to adequately provide the units housed in this facility with administrative, supply, classroom, locker, latrine, military vehicle and privately owned vehicle parking and food preparation space.</p> <p><u>CURRENT SITUATION:</u> The individuals assigned to this facility drill in an overcrowded and substandard Armed Forces Reserve Center. The existing 18,000 sf facility was constructed in 1972 to serve an USMC(R) tank company and an USAR transportation company, with a total strength of 180. The using units' military vehicles and other heavy equipment are stored and maintained at a facility located at the Yakima Training Center 18 miles distant. There is insufficient land available on which to enlarge this facility to accept the WAARNG units. The state legislature has appropriated funding for this project, which must be obligated in the 99/01 state biennium.</p> <p><u>IMPACT IF NOT PROVIDED:</u> The units will not be able to maintain its readiness, recruiting and retention, and training objectives for existing personnel. If this project is not approved and funded for FY 01, the state funding will lapse, the land will revert to the Yakima Municipal Airport and the WAARNG will lose the political momentum within the community and state. Additionally, WAARNG will have to seek a new location and start the land acquisition and bonding process all over again, which could delay this project for several years.</p> <p><u>ADDITIONAL:</u> This project has been coordinated with the state physical security officer and no force protection/combating terrorism measures other than those physical security measures required by regulations and design guides for protecting Federal property are required. This project complies with the scope and design criteria of National Guard Pamphlet (Draft) 415-12 dated 14 August 1997 and Design Guide 415-1 dated 1 June 1997. The most similar DoD standards do not address all of the current criteria incorporated in the (project type) design and thus do not yield accurate cost estimates. Therefore, state historical costs for construction of like facilities were used to develop baseline unit cost and were adjusted for size, fiscal year and location. An economic analysis has been prepared and utilized in evaluating this project. Alternative methods of meeting this requirement have been explored during project development. This project is the only feasible option to meet the requirement. Parametric estimates have not been used to develop project costs.</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION Construct unspecified minor construction projects which have a funded cost of \$1,500,000 or less, including construction, alteration, or conversion of permanent or temporary facilities or land acquisition as authorized under Title 10 USC 18233a (a) (1). Air condition - None					
11. REQUIREMENT: <u>PROJECT:</u> Minor Military Construction. <u>REQUIREMENT:</u> To provide funds for the construction of projects not otherwise authorized by law. Such requirements are the result of recognized facility shortfalls, unforeseen conditions resulting from changes in mission and equipment, or are to correct damage caused by severe weather or others acts of nature. The dollar cost for correcting these identified shortfalls are such that they do not require specific authorization in the regular Military Construction Program. <u>CURRENT SITUATION:</u> These urgent unforeseen project address high priorities such as critical mission requirements, environmental protection, health, and safety. These projects can not wait until the next annual budget submission. <u>IMPACT IF NOT PROVIDED:</u> Critically needed projects will not be accomplished, which will jeopardize personnel and/or equipment readiness.
